PERSONAL PROJECT · SEMESTER 4

Stone Visualizer

See real stone on your own house before anything is laid.

Vladi Georgiev · Fontys ICT

THE PROBLEM

Clients can’t picture the result.

Loose samples and photos of other houses don’t help them decide.

Photo: a finished job from my father’s work

HOW IT WORKS

Photo in. Real stone out.

1 Photo

2 Flat paste

3 Perspective

4 Light and shadow

THE SHOWCASE

Pick a stone. See it on the house.

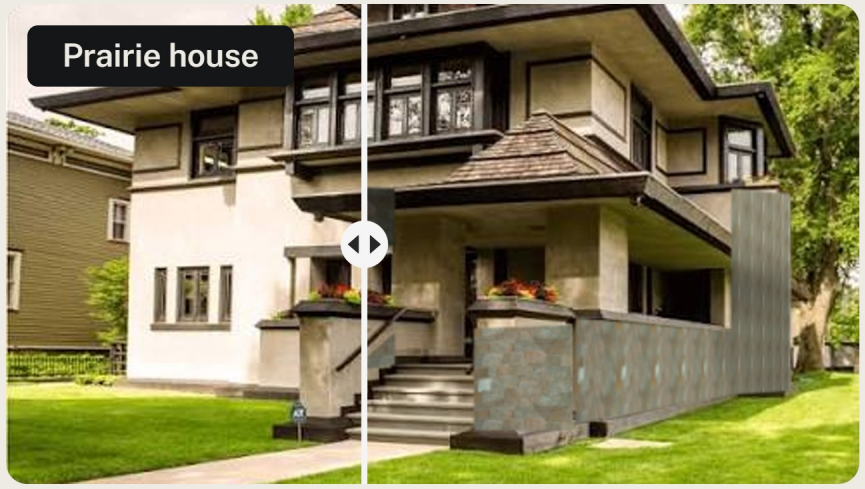

4 houses, 6 stones, each cut from a photo of a finished job.

Try it live

Learned, and what’s next

LEARNED

0.99:1

The perspective maths measured a real square of tiles almost exactly.

LEARNED

Light

Keeping the photo’s shadows makes it believable, more than a perfect outline.

NEXT

SAM2

Find the wall automatically, then train on my dad’s job photos.

Questions?

Which preview looked least real to you?
